
Noor Coffee Reader

Psychic Reader & Advisor

Noor has been reading coffee cups & pendulum for more than 35 years. Experimenting with ancient techniques and meditation induced practices that enhance her visions when interacting with people's fortunes, confronting the past and foreseeing their futures. Coffee cup reading is done by first embracing the cup that contains fresh coffee. One must inhale a bit of the aroma and take a few sips if one enjoys coffee. After that is done, the coffee is passed on to Noor, who continues the ritual by spinning the cup clockwise three times and places it upside down to let it dry, leaving residue on the cup untouched.

You will be amazed by what can be revealed by the coffee. During the process, Noor also uses her pendulum and answers any questions about Love, Luck, Money, Health, Family, Career, Romance & Relationships!

Noor Coffee Reader has been on radio, TV, participated in live stage performances and has performed in shows across the country and internationally.

Readings are not timed
